Exment Open-source web database

OPEN SOURCE × NO-CODE WEB DATABASE

Build business systems without code — a free, open-source web database

Exment is a web database for building business systems without programming. Bring the customer, project and request data you kept in Excel and scattered files together in one place, just by changing settings on screen.

Pricing does not grow with users | Keep your data in-house | Workflow, Kanban, Gantt chart | SSO, two-factor authentication

40,000+	200+	38	v7.0
installs of the open-source edition	version updates since 2018	contributors (GitHub)	released October 2026 Kanban, Gantt chart and more

As of November 3, 2026. Installs are the Packagist total (including updates); contributors are the public figures on GitHub (exceedone/exment).

4 reasons to choose Exment

1 More users, same cost

The license edition is free (GPL), and the commercial license is priced per site. Roll it out company-wide or invite your partners — the cost stays the same.

2 Keep your data in-house

Install it on your own servers, on 99% of rental servers in Japan and abroad (XServer, Sakura Internet and others), or on AWS or Azure.

3 Outside users can submit without logging in

The built-in public form lets customers and partners send applications and inquiries without an account. No paid add-on is needed.

4 Try it for as long as you need

Because Exment is open source, there is no trial deadline. Try it on your own PC until you are sure it fits your work.

New in v7: see the progress of work at a glance

NEW **Kanban view**

Show records as cards by status and move them by dragging. Works with workflows.

NEW **Workflow flow designer**

Place statuses and actions on a diagram and design the approval flow visually.

NEW **Data grid tools**

Show, hide and freeze columns, grouping, inline editing, cell styles, bulk actions and more.

Other key features: create tables and columns without code / search related data together / bulk import and export (CSV, Excel) / output quotes and invoices in Excel templates / dashboards, summaries, calendar, Gantt chart / notifications (email, Slack, Microsoft Teams) / permissions / API and plug-ins / single sign-on (SAML, LDAP, OAuth) / backup and restore / AI-OCR and AI chatbot (AWS edition)

Used for

Customer management | Projects and deals | Contracts | Inquiries | Requests and approvals | Tasks and projects | Assets and equipment | Inventory | Maintenance and support logs | Surveys and sign-ups

Exment
Developed and operated by Kajitori Co., Ltd.

COST

Annual cost for 100 users

License and subscription fees only, calculated from each company's published price list in Japan (JPY, excl. tax, as of November 2026). Setup, support and server costs are not included.

Service / plan	Price	50 users	100 users	300 users
Exment license edition (your own server)	Free (GPL)	**¥0**	**¥0**	**¥0**
Exment commercial license	¥300,000 / site (does not grow with users)	**Priced per site, not per user**		
kintone Standard	¥1,800 / user / month	**¥1,080,000**	**¥2,160,000**	**¥6,480,000**
kintone Light	¥1,000 / user / month	**¥600,000**	**¥1,200,000**	**¥3,600,000**
Pleasanter.net Standard	¥750 / user / month	**¥450,000**	**¥900,000**	**¥2,700,000**
Salesforce Platform Starter	¥3,000 / user / month	**¥1,800,000**	**¥3,600,000**	**¥10,800,000**

Competitor prices are the Japanese list prices on each company's website (kintone, Pleasanter.net and Salesforce pricing pages, checked on November 3, 2026). Prices outside Japan may differ; please check each company's website for the latest prices and terms. Full comparison: https://exment.net/en/compare/ . kintone is a trademark or registered trademark of Cybozu, Inc., Pleasanter of Implem Inc., and Salesforce of Salesforce, Inc.

Pricing and support (excl. tax)

License and cloud

- **License edition (open source)**: **free**. Install it on your own server. No limits on users or features (GPL)
- **Commercial license**: **¥300,000 / site (domain)**. Does not grow with the number of users
- **Cloud service (AWS edition)** Coming soon : a SaaS edition with enhanced AI features (AI-OCR, AI chatbot). Invitation-only now; pricing will be announced at launch
- **Cloud service (XServer edition)** Not accepting new orders : new orders are temporarily suspended while we move to the AWS edition

Support and setup

- **Ticket support**: **from ¥160,000 for 5 tickets** (questions on installing, configuring, using and updating Exment, and on problems)
- **Spot support**: **from ¥90,000 / case** (work within 4 hours)
- **Setup support pack**: **from ¥300,000** (meetings, environment setup, tables, data migration, training)
- **Table setup and data migration**: **from ¥100,000 for up to 5 tables**
- We also develop plug-ins and create document templates (quoted separately)

Prices and services may change without notice. Support hours are 10:00–17:00 JST on business days. See https://exment.net/en/plan/ for details.

How to get started

STEP 1

Free consultation

Tell us about your work, your current tools (Excel or other services) and the number of users. We explain how to build it in Exment and estimate the cost.

STEP 2

Try it with no time limit

Install it on your PC or server and check the screens and behavior. The installation guide is public in the manual.

STEP 3

Tables and data migration

With our setup support, we build the tables and move your CSV and Excel data. In-house training is also available.

Advice on switching and cost is free

Tell us how many users you have and what you pay for your current service, and we will estimate the cost with Exment.
